ACHIEVERS REMOTE MONITORING GATEWAY

CE-216 Fuel Monitoring Solution is a Quad-band intelligent GSM/GPRS+GPS IoT gateway suitable for remote monitoring and automation capable of integrating seamlessly with sensors/actuators remotely. CE-216 Gateway has the capability to interface with almost all types of sensors in the market where it periodically collects the data as per the scheduled time intervals and then communicate it to the cloud. CE-216 Gateway is completely customizable where we can add peripheral add-ons, enabling it to cater to the most complex customer requirements as well.

Features

- Access to a comprehensive IoT platform, enabling access to features such as dashboarding, alerts and notifications, reporting, automation and other related features.
- GPS capability to access real-time location.
- Universal compatibility with sensors and other related equipments.
- Real-time data feed with configurable transmission rate.
- Active SMS triggering for selected users.
- Intelligent automated notifications by analyzing the data.
- Integrate multiple devices onto single user and manage them all with live location feeds.
- Use different units with each specific device as per your requirements.
- Industry Standard MODBUS Communication protocol.
- One click data exports in excel and pdf formats.
